LEISURE LOCATIONS**

# WIRELESS FIBRE

## FIBRE SPEED INTERNET WITH NO CABLES

Great Britain is blessed with many beautiful holiday and leisure locations, many of which are off the beaten track. This usually means that fibre optic cables have not been laid close enough for them to benefit.

The national appetite for high speed internet grows by approximately 30% yearly with super fast internet becoming an expected feature of every holiday let or accommodation.

In response to the time and huge cost it takes to deploy fibre outside major cities, we have turned our attention to serving locations just like yours.

We convert fibre into wireless signals we can beam many miles away and then install a network that blanket covers holiday parks and other leisure areas.

## INCREASE REVENUE WITH WIFI

Our intelligent network is also solar powered and allows for true network separation so you can create separate networks for staff, guests and also offer a premium super speed network.

This super speed premium network for guests who want a faster connection allows for more revenue to be generated as well as the traction you will create with social media posts from happy patrons.

# THE BENEFITS

## HOW IT WORKS

- 1) We find the nearest end of the fibre optic network in the UK.**
- 2) We install our 'wireless fibre' beaming technology and aim it at your leisure location.**
- 3) We install a wireless fibre receiver and that connects to all the strategically placed wifi routers**

## SECURITY

Devices on the network cannot see each other and we operate with an encryption level that is double the level of Bank of England. We monitor suspicious online behaviour and our automated alerts ensure all users stay safe within the network.

## INTERNET SPEED

Plexus wifi can deliver as much as 100mb per user, the only limit is the speed of overall connection you decide to connect to.

You have the flexibility to decide what speed each device can use and lit the maximum so no one user bottlenecks the internet speed for other staff and guests.

# BROADBAND IS PART OF YOUR GUESTS EXPERIENCE...

## WHAT IS YOUR WIFI SAYING ABOUT YOU?

### FIBRE BROADBAND

Our proprietary Plexus mesh Wifi system ensure you have at least 80% signal strength inside each of the cottages, reception/ office and event space. The Wifi will also cover main outdoor spaces within the boundaries of the resort.

We expect a high quality of service to your customers with no more complaints about speeds being slow and internet not being available.

Each user will be assigned a speed according to their assigned tier;

- Staff
- Standard guest access (5mb each) or
- Premium guest (27mb for £5 per day).

### MESH WIFI SYSTEM

The Plexus Wifi mesh solution seamlessly converts fibre to Wifi and shares the Wifi speeds optimally and dynamically so that every user gets a good internet connection.

We also monitor the network remotely, ensuring it is up and running with a 99.99% uptime.

#### **Customer Experience**

All users simply opt into and agree to terms and conditions of use to access guest Wifi, no password will be required. Only Premium and Staff Wifi require login credentials and passwords.

#### **Revenue Share**

We propose a 50/50 revenue split for premium services. Guests can purchase this option online via the simple login window.

# NEXT STEPS...

## GETTING STARTED...

You can opt to receive a Fibre broadband internet connection only and or have us install our Plexus Wifi mesh solution for a true gigabit speed wireless network across the whole campus.

We always start with a full survey and then focus on designing the best network for your location. After this we can give you an exact install date and time for services going live.

Before you know it, you will have the fastest internet connection in your region, future proofing you location for years to come!
